**GRASS MATS<sup>®</sup>**  
**EUROPE**

Europe's leading manufacturer of rubber matting

# Grass? We've got it covered...

Rubber mats are a cost-effective solution to increasing the safety of natural grass surfaces. Common applications include...

- Children's Play Areas
- High Footfall Pathways
- Events Ground Protection
- General Ground Reinforcement

Day of installation

## Why RubbaGrass®?

Many safety surfaces require compromises, but RubbaGrass® stands out. It offers low maintenance and cost-effectiveness, making it ideal for covering large areas — unlike Artificial Grass or RubbaTiles®.

Unlike Wood Mulch and Sand, it doesn't need regular topping up and doesn't pose any safety risks.

After 4 weeks

### The grass really is greener...

Grass will grow through and cover the apertures of the rubber grass matting within 4-6 weeks, at which point the grass can be mowed as usual!

#### Green Tip #1

Please check the suitability of this product prior to installation, as Critical Fall Height will be affected by the soil type, moisture levels, and grass.

#### Green Tip #2

We recommend using Grassshield® alongside RubbaGrass® for additional reinforcement where ground is prone to get boggy.

#### RubbaGrass®

#### Artificial Grass

#### RubbaTiles®

#### Grass

#### Sand

#### Wood Mulch

	RubbaGrass®	Artificial Grass	RubbaTiles®	Grass	Sand	Wood Mulch

1. Mowing required.
2. Yearly fluffing required.
3. Yearly power wash required.
4. Friction burns are possible.

5. Hidden objects possible.
6. Heat burns are possible.
7. Regular seeding in high footfall areas.

8. Raking and topping up.
9. Can get into eyes.
10. Hidden objects and animal contamination.

# RubbaGrass® How To Install

All of our rubber matting can be fitted onto existing grass, seeded topsoil, and new turf!

**RubbaGrass®**  
green across the board.

Recycled and recyclable, RubbaGrass® is a great environmentally friendly solution.

1

## Preparation

Mark out the site where the RubbaGrass® is to be laid. Clear debris and cut the grass short.

2

## Levelling

Level out uneven areas with a quality top soil for seeding or to turf the area.

3

## Stabilise

Where ground is prone to being boggy and wet you may lay Grassshield® to help stabilise the ground in that area.

4

## Safety Mats

Lay the safety mats onto the ground, cutting to fit around any obstacles or equipment.

5

## Cable Ties

Ensure the rubber safety mats are butted closely together when laying, then use cable ties at 150mm intervals to securely join the mats together.

6

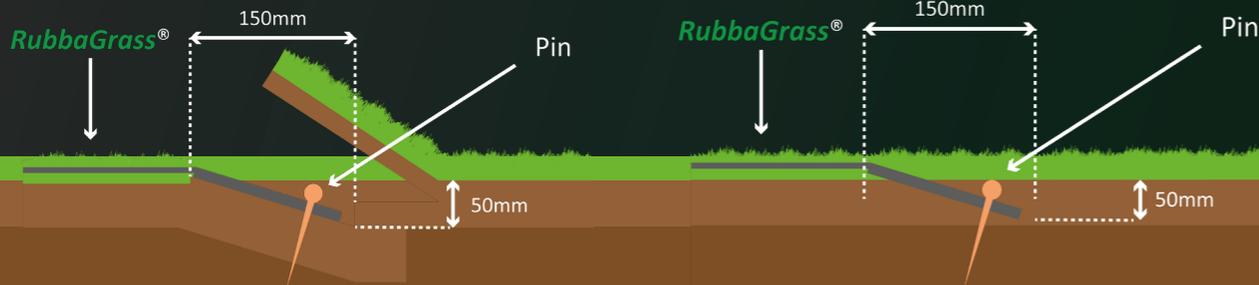

## Secure

Cut the ends of the cable ties and push the, "knuckles", of the cable ties underneath the matting.

7

## Peg Mats

Peg the mats to the ground, using approximately 3 - 5 pegs per perimeter edge.

## Green Tip #3

Tools you'll need include a tape measure, secateurs, a Stanley knife, rubber gloves, a hammer, a grass edge cutter, a rechargeable drill, and a 6mm drill bit.

## Additional Tips

These steps will achieve better edge blending and avoid tripping over the mats or having them pulled up by mowing.

Roll back approximately 150mm from the edge of the rubber safety matting using a spade or cutting tool. Put the rubber safety mats back into place and peg through the holes. Refill the edge with top soil and seed or turf to regain the original level surface.

# Additional Rubber Products

Featured Product

## RubbaEdge

RubbaEdge® has been specifically designed to install with safety surfacing and matting products to enable easy wheelchair, buggy and trolley access.

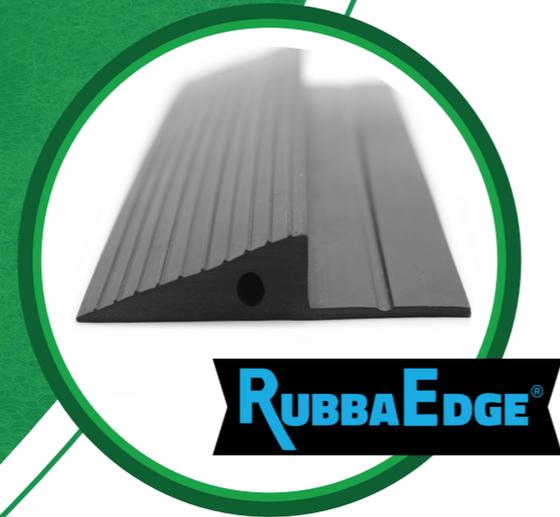

- Super easy to install
- Highly durable

Artificial Grass Edge

Wet Pour Edge

Featured Product

## RubbaSnow

Our RubbaSnow® non slip mats are a highly durable, safe flooring solution for all weather conditions. The mats are lightweight which makes them easy to install and remove as you desire.

- Easy to fit, anti-slip surfacing
- Shock absorbent, so soft on falls
- Strong tolerance of extreme cold conditions

## Product Details

Black and Green are our standard colours, but other colours are available upon special order. Commonly ordered in a pallet quantity; 60 to 80 mats.

Code	Product	Size	Thickness
SS04100/22	RubbaGrass® Matting, Black	1,500mm x 1,000mm	22mm

## FAQ's *Questioned and Answered*

**Q** | How impact resistant is RubbaGrass®?

**A** | RubbaGrass® is rated for falls of up to 3 metres, and complies with BS EN 1177:2018 as a result.

**Q** | Does RubbaGrass® last a long time?

**A** | Our RubbaGrass® comes with an impressive 10 year product guarantee, ensuring peace of mind.

**Q** | What colour is RubbaGrass®?

**A** | The standard options are black and green, but any colour is possible upon special order; just ask!

**Q** | How long before I can mow the RubbaGrass®?

**A** | Grass will begin to grow through the matting within 4-6 weeks after installation. From this point, the area can be easily mowed.
